Professional Summary

Backend Software Engineer with 2 years of experience building and supporting microservices, API gateway platforms, and distributed systems using Java, Spring Boot, Kubernetes, Docker, and Azure DevOps. Experienced in API security, production support, incident resolution, and reliability improvements across enterprise backend systems.

Experience

Capgemini

Bengaluru, India

Software Engineer

Jun 2024 – Present

- Managed API gateway platforms including **Kong** and **Axway**, routing traffic across **10+ microservices** and supporting high-volume internal API calls for **5+ engineering teams**.
- Configured gateway routing policies, request validation, and API integrations, reducing failed API requests by **15–20%** and improving platform reliability.
- Optimized API gateway configurations to support increasing service traffic while maintaining low-latency communication across microservices.
- Implemented **JWT** and **OAuth2** authentication mechanisms, strengthening API security and eliminating unauthorized access incidents across critical endpoints.
- Diagnosed and resolved production issues in distributed systems, reducing **MTTR by approximately 20%** and minimizing service disruptions.
- Identified recurring integration failures and implemented permanent fixes, improving release stability and reducing repeat incidents.
- Deployed and maintained containerized workloads using **Docker** and **Kubernetes**, supporting reliable deployments across development and production environments.
- Streamlined **Azure DevOps CI/CD** pipelines, reducing deployment failures and improving release consistency.
- Collaborated with developers, QA teams, and platform engineers to improve release stability and reduce post-deployment defects.

Projects

Hotel Management System

Java, Spring Boot, React, MySQL

- Built a full-stack hotel booking platform supporting room inventory management, booking workflows, and customer information management.
- Designed and developed RESTful APIs using **Spring Boot** integrated with **MySQL** to support core booking and management operations.
- Optimized SQL queries and database schema design, improving data retrieval performance by approximately **15%**.
- Developed responsive frontend interfaces using **React**, enabling end-to-end booking and reservation workflows.
- Implemented **JUnit** unit and integration tests to improve code quality and reduce regressions in critical application flows.

Technical Skills

Languages: Java, SQL, JavaScript

Backend Development: Spring Boot, REST APIs, Microservices, Distributed Systems

Cloud & DevOps: Kubernetes, Docker, Azure DevOps, CI/CD

API & Security: Kong, Axway, API Gateway, OAuth2, JWT

Databases: MySQL, Relational Database Design, Query Optimization

Testing & Practices: JUnit, Unit Testing, Integration Testing, Agile Development

Education

Master of Computer Applications (Information Technology), Amity University Kolkata

2021 – 2023 | CGPA: 7.92

Bachelor of Computer Applications (Information Technology), University of North Bengal

2018 – 2021 | CGPA: 8.51

Certifications

Career Essentials in Generative AI — Microsoft & LinkedIn Learning
